Steel Sliding Winch Track - 6 Foot

Sliding winch track allows sliding winches to be positioned in optimum locations dependent upon load configurations. Track design allows for slider winches to be self locking once load tension is applied. Track can be cross-bolted or capped on ends to prevent winch theft. Dimensions: .25" Thick x 6 Feet Long.

Product # H6442357NF

**** Specific Method Of Mounting Is To Be Determined By Vehicle Manufacturer Or Qualified Installer ****

Aluminum Sliding Winch Track - 6 Foot

Extruded aluminum winch track allows winches to be positioned in optimum locations dependent upon load configurations. Track is designed to allow winches to be self locking once load tension is applied. Available in 6 foot lengths.

Product # H647580AT

**** Specific Method Of Mounting Is To Be Determined By Vehicle Manufacturer Or Qualified Installer ****
