

CRIMPING TOOLS

Ratchet Crimping Tools For Terminal Connectors

Pomar offers a range of ergonomic ratchet style crimp tools. Ratchet mechanisms provide consistent crimp set each and every time and requires a full crimp set before releasing.

PVC & Nylon Terminal Tool

Double crimps using triple nested dies to secure terminals from 22 gauge through to 10 gauge.

Product # E7860198

Heat Shrink Terminal Tool

Single crimps all compatible heat shrinkable terminals and connectors. Triple nested die secures terminals and wire from 22 gauge through 10 gauge.

Product # E7860180

Non Insulated Terminal Tool

Single crimps all non insulated terminals using a quadruple nested die to allow crimping from 22 gauge through to 8 gauge.

Product # E7860186

Terminal Tool Kit

Terminal tool kit with five crimping dies allows for maximum versatility for wiring installations. Crimping dies are secured with two screws and are easily changed. Kit includes dies for the following: PVC terminals, nylon terminals, non insulated terminals, open barrel OEM style terminals and ferrules. Includes carrying case.

Product # E7860168

Crimping Tools For Battery Connectors, Lugs & Splices

Hammer Type Crimper

May be hammered or vice crimped. Heavy duty tool will crimp solderless 8 gauge through 4/0 gauge copper or tinned connectors, battery lugs or splice connectors.

Product # E7860186

Hex Style Crimp Tool

Heavy duty six sided "Hex" die lever style crimp tool provides a reliable double action crimp to terminals and lugs from 6 gauge through to 4/0 gauge. Rotating dies within the head are marked to chose correct die for desired setting. Tool will accommodate all sizes of battery terminals, lugs and connectors.

Product # E7862651

Cable Cutter

Heavy duty hand held 22" long handle copper cable cutter. Cuts up to 6/0 gauge using blades made of hardened 1075 carbon steel for long life. Made in North America.

Product # E7869887

Rosin Core Solder

60% Tin / 40% Lead x .062" diameter 1 lb spool for electrical use.

Product # S49246040

Flameless Heat Shrink Torch

Produces heat up to 1200°F. Butane fueled using standard lighter butane, windproof and waterproof design. Includes deflector baffle.

Product # E7862101

Self Standing & Self Igniting Butane Fueled Heat Shrink Torch

Features a heavy duty brass canister refillable fuel cell with a 220 minute duty cycle when full. Produces a flame up to 2500°F and has a "lock-on" feature. Removable base allows unit to be hand held.

Product # E7862103

Electric Powered Heat Shrink Gun

Features a lightweight ergonomic polycarbonate housing with 1200 Watts of power and two heat settings of 750°F and 1000°F. **** Baffle Sold Separately ****

Product # E7869888

Product # E7869891 Baffle Only
