

SPLASHGUARDS

Pomar supplies a complete range of Canadian manufactured splashguard products in both rubber and poly grades. All splashguards are sold by the each.

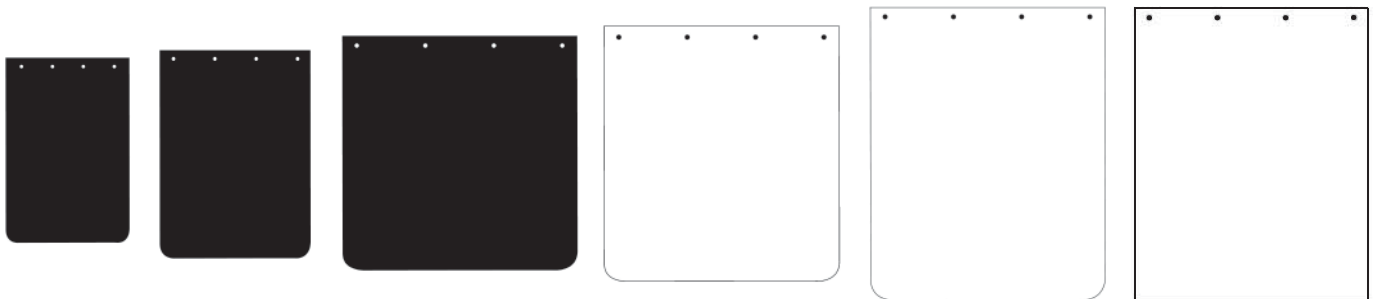

Rubber Splashguards

Rubber splashguards are composed of recycled tire core and are fiber reinforced to promote a high quality product. They are offered in economy die cut (3/16" thickness), standard duty (1/4" thickness), heavy duty (3/8" thickness) and extra heavy duty (1/2" thickness). Single, tri and quad header styles as well as spray suppressant backing are offered as standard features or as options on most models. Coloured rubber is also available. Your custom logo can be added as either screen painted or raised molded and painted in single or multiple colours. Many size variants are available so please contact your Pomar sales representative with your requirements.

Poly Splashguards

Poly splashguards in either white or black thermoplastic are available in three grades of quality: economy (3/16" thickness - smooth back), standard (1/4" thickness - anti-spray back), and heavy duty (3/8" thickness - anti-spray back). Coloured poly is also available. Square or rounded bottom corners are a no charge option. Custom logo's can be either hot stamped or screen printed in single or multiple colors. Please contact your Pomar sales representative with your requirements.

Standard Stocked Plain Rubber Splashguards
